HEPA-2000

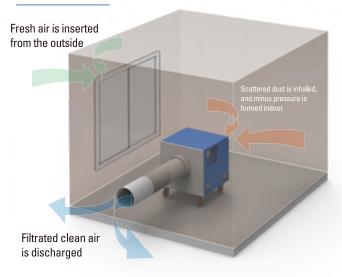

PORTABLE AIR SCRUBBER

Each **portable air scrubber** is equipped with a high-efficiency HEPA filter that removes **99.97% of all airborne particles.**

Portable air scrubber features 3-State filtration-prefilter to capture large particulates, a second filter to capture smaller particulates, and HEPA filter to capture microscopic particulates. They are utilized for cleaning the air of a variety of airborne contaminants.

Applications Include, but not limited to: Construction sites, Hospitals, Schools, Restoration, Bars & Restaurants and Office Complexes

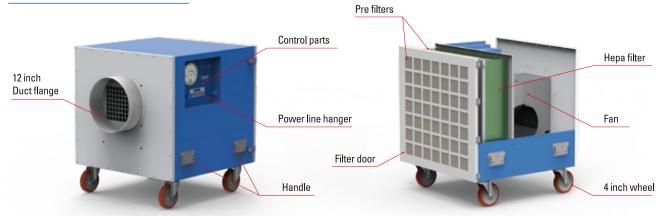

Indoor Use

Outdoor Use

STRUCTURE & DESCRIPTION

HEPA-2000 Specifications

Voltage	115Va.c 60Hz
AirFlow	1,950 CFM (High)
	1,410 CFM (Low)

Power Consumption	1.25 kW (High)	
	1.06 kW (Low)	
Weight	132 lbs	
Size (WXDXH)	28,5 X 30 X 30 inch

3 Stage Filtration

The HEPA-2000 filter is a type of high efficiency particulate air filter. The air filter can remove at least 99.97% of airborne particles 0.3 micrometers in diameter. Particles of this size are the most difficult to filter and thus the most penetrating particle size. Particles that are larger or smaller are filtered with even higher efficiency. HEPA filters are the most effective air filtration filters to remove contaminants from the air.

Control panel

- ① Pressure Gauge
- 2 Pressure Sensing Port
- ③ Circuit Breaker
- 4 High-Off-Low Switch

Ideal Applications
